

Coding Test-Web Application Developer

Objectives:

1. Draw proper Database with **PK** (Primary key), **FK** (Foreign key), **Index** for above Table and Filters
2. Write **CRUD** operation with **image** and **filter** for above screen. (Authentication, Authorization not needed).
3. Create **api and display** card view in frontend.
4. Minimalistic **Responsive** Design (Ex. Bootstrap).
5. Export **SQL** database file into **DB** folder.
6. Provide proper **commenting**.
7. Upload the code on your personal **GitHub** and share the link on the reply email.

Hints:

- Subject depends on Class.
- Class depends on Version.
- Common Quiz column for Quiz table.

Tools:

- ✓ Laravel (Latest Version) Backend.
- ✓ Vue (Latest Version) Front end.
- ✓ Use design pattern (Ex. Repository).

Time Duration: 36hours.
